

Junior Developer

Core Development, Automated Tests & Tools

You're invited to join a wonderful team in a young startup, funded, already selling to some of the leading banks and financial institutes worldwide. We're looking for a junior **backend developer**. We offer you an optimum work environment combined with global team work, great learning opportunities and also, lots of fun!

Must have:

- 1-3 years of experience in high-tech
- Computer Science B.Sc degree
- .Net C# Experience – at least 1 year
- Object Oriented programming
- Working with relational and non-relational databases
- Great teamwork and communication in Hebrew and English

Advantage:

- Experience working with AWS
- Experience in micro services architecture or SOA
- Working with the following technologies and tools: MongoDB, MySQL, Jenkins, Octopus, ELK, Hangfire, RabbitMQ

Role responsibilities:

Area	Description	Tools / Technologies
Ongoing development	Take an active part in the design and development of our core product as part of the backend team	AWS, C#, MongoDB, RabbitMQ, MySQL, Hangfire
Continuous integration	Automated build	Jenkins
Continuous integration	Automated tests	MSTest
Continuous and manual Deployment	Master the deployment process to all environments (database, binaries, configurations, etc)	Octopus Deploy AWS SQS Bash / PS1 Scripts Elastic beanstalk dbForge
Simulators	Proprietary build of simulators, that can simulate clients, vendors and humans interacting with the system	Proprietary code
Logs monitoring	Ownership of our log monitoring framework, used to analyze our logs, troubleshoot, etc. Aggregate logs from various sources – microservices, cloudflare, etc	ELK
Security	Ownership of multiple security aspects, tools and practices	VPN AWS security groups
Database	Basic DBA tasks (rebuild indexes, schema compare, recover from backup, etc.)	dbForge MySQL (Workbench) MongoDB (Robo Mongo)
