

Manual QA

The role:

This position is suitable for an experienced manual QA person who will join a top notch experienced team in a startup developing a financial product that is already sold to Tier 1 banks and other financial institutes.

The QA person will be involved with all QA aspects of the team project; including managing the entire testing cycle of the GUI client/server applications including planning, documenting and performing manual and integration tests.

Job Description:

Must have:

- At least 2 years of experience of manual QA
- Experience testing a large project, with many server side, client side and database components
- Degree in computer science or other related field
- Great communicator and best interpersonal abilities
- Excellent English

Advantage:

- Experience working with Cloud (AWS advantage)
- Experience writing code in .Net, preferably C#
- Experience with Relational DB, preferably MySql
- Experience with NoSQL, preferably MongoDB
- Experience with SOA and/or Microservices
- Experience with RabbitMQ
- Experience with CI/CD
- Experience with the financial industry
- Working on high scale and high volume platforms
- Knowledge with AWS administration
- Experience with DevOps
