

**Job Description**  
**Product Manager**

[www.cappitech.com](http://www.cappitech.com)

**The Company**

Cappitech is a leading provider of regulation technology for the financial services industry. Through Capptivate, our regulatory service platform, customers can easily automate submission and analyze their daily trades to comply with international financial transaction reporting obligations. Our cross-regulation platform uses state-of-the-art technology to provide a unified experience for all regulatory reporting along with an industry leading analytics dashboard to process and audit review compliance reports. Trusted by over 60 financial institutions, Cappitech provides superior service and personalized guidance using its vast operational regulatory expertise.

Led by a team of experienced FinTech professionals with a proven track record, Cappitech has been named a RegTech 100 company – one of the world's most innovative RechTech companies by FinTech Global, a data and research firm. In addition, earlier in 2018 the company raised \$4M in capital funding from a leading VC and private investors

**The Role & Profile**

Well experienced, motivated professional who'll lead our current and future products. The Product manager will take part in defining the product strategy and roadmap. Will have full ownership on the product life cycle (market analysis, concept, requirement definition through launch) while constantly interacting with internal factors (R&D, Support, Sales) alongside our international customers, industries' factors and more.

An individual who brings real value with a proven track record. Someone who strives towards success and achievements while demonstrating creativity and proactivity.

Reporting directly to the company's VP, Professional Services.

**Personal & Professional Requirements**

Proven successful experience (2-5 years).

- Deep familiarity with product management's processes and environment
- Industrial and management engineer or any equivalent academic degree
